EDUCATION

Bachelors In Computer Science

Expected - 05/27

Colorado State University

- Relevant Coursework: Software Engineering (Java), Systems Security (Python), Data Structures and Algorithms (Java), Machine Learning (Python), Software Development (Java), Interpersonal Communication, Calculus 1, Linear Algebra (MATLAB), Discrete Structures, Computer Architecture (X86 Assembly)

PROJECTS

Weather App

Technologies: Java, Swing, Restful API

- Built a weather app using restful API Uses Open Meteo for weather data, includes pictures, temperature, forecast, humidity, and windspeeds Uses java swing for the graphical user interface Has a search bar to display the weather of a desired location

Unity Simulator

Technologies: Unity, JSON, C#

- Two-dimensional life simulator JSON files for custom animals and food Inspired by a previously taken biology class Features user interface settings, full animal behavior, movement, and characteristics

X86 Assembly Console Game

Technologies: MASM, Assembly language, Concurrency

- Project made for final in Computer Architecture class that runs in console Includes Unicode characters, coordinate based movement system, collision detection, objective movement, and timer system

WORK EXPERIENCE

Precision Security

07/24 - Present

Security Guard

Fort Collins, CO

- Responsible for asset protection, property surveillance, access control, incident response, enforcing client safety policies, effective communication, and deescalating conflict

Advance Auto Parts

08/21 - 09/23

Retail Parts Professional

Fort Collins, CO

- Provided excellent customer service, processed cash and credit card sales, answered phone calls, gained parts and automotive knowledge, completed cycle counts, restocked inventory, installed batteries and wiper blades, trained new employees, and performed opening and closing duties

Super Vacuum Manufacturing Co

09/20 - 02/21

Welder & Fabricator

Fort Collins, CO

- Applied advanced MIG, TIG, and Oxy-Acetylene welding techniques to design, fabricate, and assemble mission critical ventilation systems for first responders and the military

AWARD

Lockheed Martin Vocational Scholarship Recipient

01/24 - 01/25

KEY SKILLS

Programming Languages: Python, Java, C#, C++, HTML, CSS, JavaScript, Lua

Frameworks and Tools: JUnit, Maven, Gradle, Visual Studio, MATLAB, Docker, GitHub Actions, Git, GitHub, Postman, Word, Excel, PowerPoint

Concepts: Restful APIs, Machine Learning, Agile Development, Test Driven Development, Clean Code, Design Patterns, Concurrency, Version Control

Work & Interpersonal: Active listening, communication, dependability, teamwork, adaptability, flexibility, problem solving, critical thinking, conflict resolution, creativity, innovation, and attention to detail
